Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "a clad region formed on the opposite side of the substrate not having the core region", the horizontal direction, the vertical direction and "a stripe width is modulated in the **vertical** direction against the optical axis" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 4 and 14 are objected to because of the following informalities: they lack an ending period. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 2828

4. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the limitation "a clad region formed on the opposite side of the substrate not having the core region" in lines 3-5. It is not clear where this is support for this in the specification. Furthermore, claim 1 recites "a stripe width is modulated in the **vertical** direction against the optical axis" in lines 9-11. Claims 2-20 are rejected for the same reasons.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "where a lateral mode is identical" in the last paragraph. It is unclear to what it should be identical. Claims 2-20 are rejected for the same reasons.

Claim 1 recites the limitation "the gain region" in the last paragraph. There is lack of antecedent basis for that limitation. Claims 2-20 are rejected for the same reasons.

Claim 1 recites the limitation "the lateral width" in the last paragraph. There is lack of antecedent basis for that limitation. Claims 2-20 are rejected for the same reasons.

Claim 4 recites a range of lengths L in the last line, but the little L, i.e. "l", has not been defined.

Claim 14 recites a range of lengths L in the last line, but the little L, i.e. "l", has not been defined.
